

CCM Update 3, 2006

This update includes changes made to correct minor typographic and spacing errors, as well as to update web addresses, bibliographic references, and organization name changes, etc. New examples were added to several sections as proposed by catalogers. Wording in notes, field, subfield tagging and indicator values were reviewed and updated in some existing examples to reflect changes in practices. Of more significant note is the addition of CONSER's new practice of providing multiple linking fields and limiting the use of 580; the recent implementation of code "i" records; and LC series change.

Module/ Section	Page	Addition/Change/Deletion	Replace pages
0.3.	10	Updated information on implementation of code "i" records	9-12
1		Corrected page numbering	All pages
1	3-4	Updated references	
1.3.2.	11	Removed note to consider canceling LC monograph records before redoing a title as a serial	
1.5.2.	15	Changed "lcweb" to "www"	
2	1	Corrected spacing	1-2
2.2.2.	18	Added footnote re. LC Series Change	17-26
2.3.1.b	21	Updated information on implementation of code "i" records
